Lisa - Can you check with the Assessor's office on the ownership for both the A-31 site as well as A-45 site that Dan was assuming belongs to Citizen Name/Ex. 6 That will help us to track down the right owner for access. Thanks.

Did Silverton get a lot of snow yesterday?

Subject: FW: Changing station A33 to A31

Hi

To avoid any potential contribution from contamination in Eureka Gulch or the old mill, we have decided to move our "upstream of Eureka" location (A33) further upstream. There is an ARSG location (A31) that is described as upstream of Niagara Gulch with coordinates listed as

37.8864            107.5617

This plots up across the river from the structures above Eureka.

Other than this change, the list is the same as I sent earlier and is considered final. EPA is working on access.

Dan
